Personal Projects

ivanovedgar.wordpress.com/

My Industrial Year Placement blog

July 2012 - August 2013

github.com/ivanovedgar

Contains personal projects and university assignments

Present

Interests

I have a keen interest in new technologies and enjoy reading IT journals in my spare time, mainly focusing on hardware development. Working with open source projects related to the CMS, home media servers and Raspberry Pi. I also own a VPS that hosts my personal website and is being used for VPN. Enjoy hiking with friends and regularly explore National Trust places in the holidays.
